

FLIP SYSTEM 1

One of the obstacles will be that there is no letter matching in Arabic and Latin; "B" in Latin won't always match "B, ب" in Arabic. It will be so complicated to create because only 1 combination is allowed at a time.

Only 1 combination is allowed

FLIP SYSTEM 2

Or no flip system! each plate can be modified independently, no rotation but a slide plate like movement. This can give the possibility of creating as much as combinations needed.
