

## Vibrations Within

We are inevitably affected by our surroundings, absorbing inspiration by gaining knowledge from new environments and people. The spaces we occupy are also impacted by a multitude of changes that are imposed upon them, whether through natural or man-made forces. Yet, whilst these changes and influences may at times seem remorseless, even overwhelming, there is an innate rhythm, an almost unnoticeable vibration at the core of existence that remains constant, continually defining the character of the space it occupies. We may not always be able to interpret these signals, or even be aware of them, and yet they affect who we are and how we live.

The intention of "Vibrations Within" is to provoke artists to investigate the energy of change and articulate it through their artwork. Artists are invited to submit new or existing works according to the theme

### **Submissions should include:**

- A completed submission form (attached below)
- CV, artist statement & short bio
- A description of proposed work
